

Seal of Service

Daniel Stringham from the IT department has been nominated for the Weber County Seal of Service Award. Daniel is a Programmer/Analyst. Since he was hired, he has always been gracious when asked for assistance of any kind. He was very efficient in posting job openings and removing them in a timely manner. Daniel has since helped Human Resources, and the County as a whole, by creating a new dashboard for job postings where applicants can apply online and managers are able to view them, as well as make hiring decisions all through the site. He will soon be launching an online onboarding system. His work is excellent and Weber County is lucky to have him as an employee. He deserves recognition for his attitude and work ethic. He really goes above and beyond!
